Retail Solution

IT solutions for your store

Adega storepad2

Mobile till system.

When your till finds its feet, cashing will be even more flexible.

Turn your sales staff into sales experts. All items in colour and style will be clearly shown with its local stock, including accessories and its matching additional items. Never lose track of your customers.

Ditch time-consuming phone calls with other branches and easily retrieve online stocks in other subsidiaries.

Stand out with cutting-edge service. Send an email transaction receipt to any mobile phone, post a „like“ on Facebook and tweet your recently bought items.

Adega factura

Web based billing solution.

ADEGA factura is an order solution for customer's orders – B2C (Business to Consumer) and resellers – B2B (Business to Business). This way gross and net invoices can be easily issued.

ADEGA factura is web based and mobile and accessible from any internet compatible system.

Adega CRM

All for your clients.

ADEGA CRM combines an extensive customer administration with a web presence, where customers can check and maintain their orders and shopping lists.

ADEGA CRM supports you efficiently and fosters confidence and customer loyalty.

Adega POS

Professional branch based Till System.

ADEGA POS extends the professional till by replacing your backoffice with functionalities like stock transfer, customer order, purchase against invoice, stock request, reservation, message system and many more.

With ADEGA POS, rolling out and servicing the till system is just a download process: there is no safer and easier way.

Overall solution

bakery | convenience | kiosk
groceries | beverages
fashion | shoes

Adega store manager

Administration for 1..1000
stores.

ADEGA storemanager manages any number of branches in any possible regions or countries, currencies, languages, legally conformant POS and data configurations, staff and authorization profiles as well as all other resources.

ADEGA storemanager supplies all connected branches with the respective master data handling goods, prices and client data.

ADEGA storemanager holds a multiple secured transaction pool to provide all transactions for statistics and analyses.

ADEGA storemanager's statistic module offers a wide range of standard evaluations for day-to-day business and a continuing stock optimisation.

Adega interface

SAP, Datev, Dynamics, Sage
e.g.

Interfaces are getting more and more important. ADEGA offers already important interfaces that can be configured with little time.

Adega ERP

Branch based ERP.

ADEGA erp is being used, wherever there is no central retail planning and control application running and inventory has to be available in the branches.

ADEGA erp contains inventory management in stock and on the shelf, order management including optimized order suggestions, delivery control, price control, labelling and inventory.

ADEGA erp also is web based. Data and processes can be used on any internet compatible system.

Adega accountig

Store based
bookkeeping.

All ADEGA systems work with accounting plans by principle of double bookkeeping.

All bills are processed in real-time. Your bookkeeping is always up-to-date.

FREITAG

"Adega professionally supported our further expansion to the USA and Japan by providing the necessary till configurations."

BOSE

"We have run ADEGA for 7 years and will be adding stock and replenishment possibilities. Then of course looking at the iPad solution. The gift voucher module is also interesting."

DSPX

"Overseas internet does not always runs smoothly. Even offline ADEGA tills work properly and safe."

GRIESSON - DE BEUKELAER

"Support of Adeqa works well, because all systems are serviced remotely."
